Our school aims to enhance children's experience of starting school by providing programs for children in the year prior to school. The development and delivery of transition programs involves school staff and external experts who can contribute to a successful start to school for each child. The transition program provides a shared understanding among early childhood services and schools as well as families about what is important for children during this time.

Our transition program includes:

- School information presentations
- School information packs
- One to one opportunities for interviews with the principal
- School walks with the principal
- Dedicated transition sessions
- Opportunities for extra transition sessions as required by an individual child
- Kindergarten visits as well as communication via phone calls
- Processes to support students with EAL and special needs
